

Section	Action	Parameters/Values
Data Loading	Select 'Tumor only' and load Excel in Tumor only mode	File: batch1_filttrat.xlsx
Data Loading	Select 'Paired' and load Excel in Paired mode	File: mut.xlsx
Mode Validation	Select 'Tumor only' but load Paired file	File: mut.xlsx with Tumor only mode selected
Mode Validation	Select 'Paired' but load Tumor only file	File: batch1_filttrat.xlsx with Paired mode selected
Filters - VAF	Adjust 'Min VAF tumor'	Values: 0, 0.5, 1
Filters - VAF (Paired mode)	Paired mode: Adjust 'Max VAF control'	Values: 0, 0.5, 1
Filters - Coverage	Adjust 'Min total reads tumor'	Values: 0, 50, 100
Filters - Coverage	Adjust 'Min alternative reads tumor'	Values: 0, 2, 5, 10
Filters - Annotation	Change 'Annotation impact'	Select/deselect: HIGH, MODERATE, MODIFIER
Filters - CGI	Only with CGI-Oncogenic Summary column	Select oncogenic categories
Filters - OncoKB	Only with OncoKB column	Selectors: Likely Oncogenic, Oncogenic
Filters - Mutation Types	Change 'Mutation types to show'	Select Missense, Frameshift, Splice_Site
Metadata - ColData	Load valid coldata file (.xlsx)	File: colData.xlsx
Metadata - ColData	Change 'Sample metadata columns to show'	Select 1, 3, 6 columns
Metadata - ColumnDataTable	With coldata loaded	View ColumnDataTable
Metadata - ColumnDataTable	Search in ColumnDataTable	Type sample name
OncoPlot - Controls	Change 'Show genes mutated in at least (%)'	Values: 5%, 25%, 50%, 75%
OncoPlot - Controls	Use 'Add specific genes'	Select genes
OncoPlot - Controls	Change 'Gene order' (if reference cohort loaded)	Select: Mutation frequency, Reference cohort frequency
OncoPlot - Colors	Expand 'ColData colors' and change colors	Edit color for one variable
OncoPlot - Font Size	Change 'Gene name font size'	Change values
OncoPlot - Font Size	Change 'Sample name font size'	Change values

OncoPlot - Download	Click 'Download PNG'	OncoPlot visible on screen
Reference Cohort	Load reference cohort file (cBioPortal format)	File: TCGA.txt
OncoPlot - Controls	Change 'Gene order' (only if reference cohort loaded)	Select: Mutation frequency, Reference cohort frequency
General - Help Tab	Click 'Help' and question icons	Navigation

Expected Behavior	Status	Notes
File loads successfully. No Control columns present.		
File loads successfully.		Aprox 1-2 min loading
Error displayed: 'Wrong variant calling mode: you selected Tumor only, but this file was generated in Paired mode.'		
Error displayed: 'Wrong variant calling mode: you selected Paired, but this file was generated in Tumor Only mode.'		
OncoPlot redrawn. Higher VAF threshold = fewer variants shown. Mutation count decreases.		
Germline variants filtered. Low Max VAF = only pure somatic mutations shown.		
OncoPlot updated. Variants with low coverage removed. Plot simplified.		
Variants with limited support filtered. Less noise in OncoPlot.		
OncoPlot shows only selected mutation types. Deselected types disappear.		
CGI selector appears. OncoPlot filtered by CGI oncogenic category.		Only for human (ex. Batch1_filttrat.xlsx)
It shouldn't appear, we don't have an oncoKB column		Only for human
OncoPlot shows only selected types. Plot colors correspond to types.		
File loads. Dynamic selectors created for metadata columns (max 6).		
OncoPlot updated with color annotations at bottom. Maximum 6 columns shown.		
Table shows samples with their metadata. Filtering/searching updates OncoPlot.		
Table filtered. OncoPlot shows only matching samples.		
OncoPlot shows more or fewer genes by threshold. Max 75 genes always shown.		
Those genes appear in OncoPlot even if below threshold.		
Gene order in OncoPlot changes. Legend indicates ordering criterion.		
Color in bottom annotation of OncoPlot changes immediately.		
Font size of gene names on Y-axis of OncoPlot changes.		
Font size of sample names on X-axis of OncoPlot changes.		

PNG file downloaded with all current changes applied to OncoPlot.		
File loads. Left annotation on oncoplot appears, name depends on the name of the file		Only for human (ex. Batch1_filtrat.xlsx)
Gene order in OncoPlot changes. Legend indicates ordering criterion.		
Help tab opens with complete user guide. If you click the blue question icon it opens directly at the corresponding section.
